

KEEP PRODUCTION MOVING WITH

brother

R650 SERIES

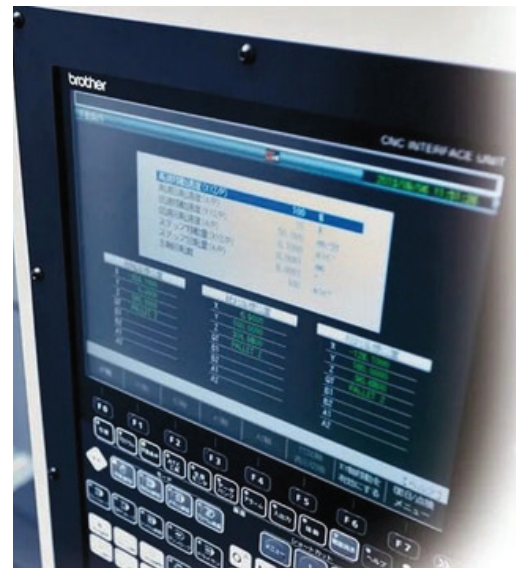

R450 SERIES

High-speed pallet changing for
maximum spindle utilization.

The Brother SPEEDIO R450 and R650 are compact pallet-changing machining centres designed to maximize spindle uptime through high-speed pallet exchange, reduced setup interruption, and flexible production capabilities for both high-volume and mixed-production environments.

The R450 is optimized for compact applications, while the R650 accommodates larger workpieces and expanded tooling configurations.

- ✓ High-speed dual-pallet changing for continuous production
- ✓ Simultaneous machining and next-job preparation
- ✓ Reduced idle time and increased spindle utilization
- ✓ Maximum productivity from a compact footprint
- ✓ High-speed Brother controls for efficient operation
- ✓ Flexible tooling options for diverse applications
- ✓ Improved throughput without compromising accuracy
- ✓ Reliable performance in demanding manufacturing environments

Ready to automate your end-of-line operation?
Contact us today!

Source Atlantic delivers trusted products, technical expertise, and responsive support to help keep your operation moving smoothly. From CNC equipment, industrial and safety products, and turnkey Robotics solutions to on-site repair services, our team is ready to help you with the next steps to a safer, more productive workplace.
