VENDOR MANAGED INVENTORY

Always Stocked. Always Ready.

Vendor Managed Inventory (VMI) improves product availability while reducing costs and administrative effort. With inventory levels actively monitored and managed, customers gain better control, improved organization, and more time to focus on their core operations.

Key Benefits of VMI Include:

- ✓ Reduced stock-outs and disruptions
- ✓ Lower overall inventory costs
- ✓ Improved productivity
- ✓ Simplified procurement and administration
- ✓ Better organization and visibility
- ✓ Improved safety and compliance
- ✓ Scalable and customizable

VENDING

MOBILE STORES

POU (Point Of Use)

BIN STOCK

VENDING MACHINES

Inventory at the Point of Need.

Conveniently placed inventory vending solutions provide visibility into supply levels, streamline replenishment, and ensure you always have the items you need on hand.

Discover how industrial vending can transform your workflow — embrace the power of smarter supply management!

COIL STYLE

LOCKER STYLE

OTHER STYLES

Discovery Focus Areas

- ✓ Understanding of current state
- ✓ Customer vision
- ✓ Item spread and usage details
- ✓ Customer pain points
- ✓ Administrative status
- ✓ Security requirements
- ✓ Replenishment schedules

BIN STOCK

The Right Inventory, Exactly How You Need It.

Maintain the right inventory in the right location with organized, visible, and automatically replenished stock. This prevents stock-outs and improves operational efficiency by maintaining the right amount of product at the right location. This ensures continuous availability while minimizing excess inventory and associated costs.

OPTIMIZED SPACE

Facilities are assessed, organized, and restructured so materials are accessible to ensure space is optimized for management.

LOCAL MANAGEMENT

A dedicated local rep can monitor inventory, generate orders, and deliver products directly to the facility, ensuring timely restocking and service.

INVENTORY VISIBILITY

Each bin is labeled and tracked, allowing staff to see exactly what is on hand and where it is located.

DATA TRACKING & REPORTING

Usage can be tracked by location, general ledger code, or other metrics, providing insight for cost reduction and productivity improvement.

**Replenishment can be handled by us or the Customer.

POINT OF USE

Scan It. Track It. Control It.

Our Point Of Use systems complement our Vendor Managed inventory offering, giving you clear visibility and understanding of your inventory.

- Receive usage reports on consumables and checked-out/overdue reports on durables.
- Software can append transactions to a project or work order number.
- Set limits by crew or employee – or even limit which types of items certain crews or employees have access to using.

DIGITAL COMMERCE

Connecting Employees to What They Need.

Digital tools that streamline purchasing, strengthen compliance, and improve access to approved products and programs.

Standard Features

Standard Features give your team immediate access to powerful account management tools at no additional cost. From viewing order history and managing user permissions to setting budgets and spending controls, these features are available as soon as you sign up for online access.

- ✓ Invoice, Quote & Order History
- ✓ Create Shopping Lists
- ✓ Create and Manage Account Users
- ✓ Set Account Budgets
- ✓ See Account-Based Pricing
- ✓ Online Request for Quote (RFQ)
- ✓ Set Reminders
- ✓ Upload Order Cart with Excel
- ✓ Check Branch Inventory

Advanced/Custom Features

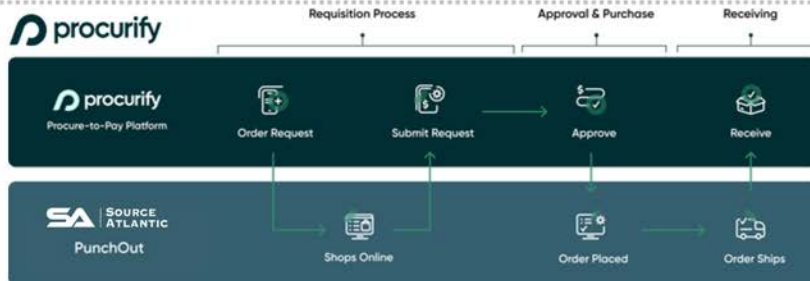

Custom Features provide tailored digital solutions designed to address your unique business challenges. Implemented with support from our team, these advanced tools help streamline processes, improve efficiency, and create a more personalized purchasing experience.

- ✓ Upload Contracts
- ✓ Change User Buyer Levels (Account Access)
- ✓ Upload Your Internal Part Numbers
- ✓ Create Custom Landing Pages or Interface
- ✓ Access Custom Reporting
- ✓ Hide Items from Catalogue
- ✓ Add Custom Items
- ✓ Use the Promotions Tool (Provide Employee Allowances / Boot Program)

ERP Integration

Procurify PunchOut is an integration protocol that connects the Procurify procurement platform directly to Source Atlantic's eCommerce website. It lets users browse live catalogues, pull real-time pricing and inventory into an internal order request, and automate purchase orders without separate login credentials. This ERP integration helps streamline ordering and is compatible with any system.

MOBILE STORES

Bringing Inventory Directly to the Jobsite.

The mobile store brings a fully stocked, customizable container to your location — providing you the products you need, when you need them.

"Its like having a hardware store with you wherever you go, with stock that never runs out."

— Danny Marr | Lorneville Mechanical Contractors

Customizable inventory usage reports and more

ASSET MANAGEMENT

Track Assets. Ensure Compliance.

Hassle-free asset management solutions help organizations maintain confidence that critical assets are compliant, safe, and performing as intended.

Using cloud-based asset management supported by RFID technology, industrial assets are tracked and managed across their entire life-cycle. Dedicated service teams conduct thorough safety inspections and provide digital certifications stored online for easy access and audit readiness. Proactive scheduling of future inspections ensures assets consistently meet—or exceed—regulatory and safety requirements.

- ✓ Search asset maintenance history
- ✓ Manage inspection due dates
- ✓ Certification & testing documentation management

ANALYTICS & INSIGHTS

Turn Inventory Data Into Action.

Data analytics brings clarity and control to the supply chain by turning inventory activity into actionable insight. Through the use of tracking, custom reporting, and performance dashboards, organizations gain visibility into spend, consumption patterns, and inventory performance. These insights support better forecasting, more accurate budgeting, and proactive decision-making. Our team helps identify opportunities to reduce costs, optimize inventory levels, and improve operational efficiency.

Track your costs per hour compared to budget and stay on target!

We can provide:

- ✓ Usage on PPE, small tools, and consumables
- ✓ Check-out and overdue reports on durables
- ✓ Spend analytics per user, per day/week/month
- ✓ Real-time analytics

EXPERT TEAM

Our expert solutions support team brings confidence and clarity to complex operational challenges. With deep industry knowledge and hands-on experience, specialists work closely with customers to assess needs, recommend the right solutions, and provide ongoing support.

- ✓ Project management support
- ✓ Implementation team
- ✓ Continuous improvements & feedback
- ✓ Business relationship management
- ✓ Validation of progress
- ✓ Product line audits
- ✓ Inventory cycles
- ✓ Billing customization
