ASSET MANAGEMENT

INVENTORY MANAGEMENT SOLUTIONS

Track Assets, Ensure Compliance.

Asset intelligence that supports safety, audit readiness, and operational performance.

With our asset management technology solutions we can efficiently manage the certification, tracking and inspection of industrial field assets throughout their lifecycle. Our innovative safety tracking solution helps our customers reduce costs and liability, as well as enhance safety and peace of mind. Our Asset Management offering includes:

- On-Site and In-Shop Inspection Services
- Recordkeeping and Live Reporting
- Service Scheduling

Inspection Services

To get you started, our service team will perform an on-site or in-shop inspection of existing assets for safety and compliance. Assets will be RFID tagged or serialized to be tracked through our management software. We ensure that your assets meet or exceed OSHA, ASME, ANSI, CSA and local regulations. Some of our rigging & lifting in-house testing equipment include:

- Lloyd's Approved Test Bed is capable of up to 700,000 lbs. with destructive testing up to 700,000 lbs.
- CM 26,400lbs Chain Hoist Test

Recordkeeping & Reporting

Log in to our asset management program, to view the status of your assets. The program provides fast and simple real-time reporting for how many assets are in the field, recertification due dates (what is or isn't due for inspection), and asset history and details.

Service Scheduling

Items will be proactively scheduled for future inspection and recertification. Let us help you manage your field assets that require tracking, regular maintenance, and calibration or certification.

Consider:

- Synthetic, wire, and chain assemblies
- Fall arrest equipment
- Overhead cranes
- Electric hoists
- Ladders
- Wire rope
- Synthetic and Slingmax round slings
- Chain falls
- Instrumentation and calibration equipment
