MOBILE STORES

INVENTORY MANAGEMENT SOLUTIONS

Bringing Inventory Directly to the Jobsite.

Keeps crews supplied with critical products, even where power and infrastructure are limited.

The Mobile Store brings a fully stocked, customized container to your locations. Easy, convenient, and the product you want when you want it. These containers can be moved easily from one location to another as work progresses, or from site-to-site at job completion.

Another feature of our Mobile Stores is they can be used even in very remote locations where power is limited.

Features

All our Mobile stores feature:

- Fully Customizable set-up
- Equipped with shelving, product bins, and labeled accordingly
- Inventory is managed by monitoring stock levels and replenishing based on usage
- Reports, analysis, and performance measures for management
- Flexible payment options – by transaction or monthly rental

Add-ons

We also offer optional add-ons to suit your needs:

- Loaded with a warehouse Inventory Management System
- Employee scan access for security and tracking
- Store can be manned with our employees, your employees or if necessary can be unmanned
- Tool Management

Analytics

Advanced Analytics:

Leveraging advanced design tools and analytics to deliver strategies that reduce costs and track key metrics, including project cost per labor hour.

We can make recommendations to help you Identify cost savings by giving you visibility to extended details about your consumption. Reports can provide complete usage history by location or by project.
