

Skid-Gard™ Floor Tapes

Create a high-traction surface to prevent slips, trips, and falls.

Place anti-skid floor tape on walkways, ramps, loading docks, steps, and stairways to help maintain a safe-stepping workplace on wet or greasy floors.

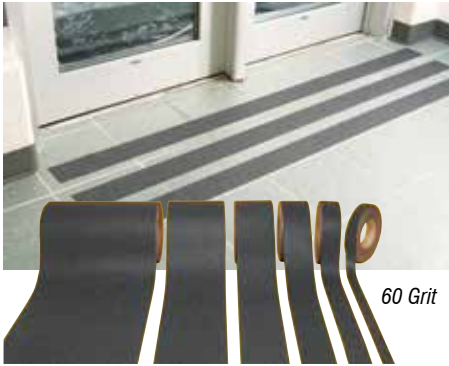

- Tape has aggressive 60-grit aluminum oxide compound layer impregnated onto a thick PVC base
 - Ensures safe-footing by providing good grip, wear resistance, weatherability, and water resistance under normal traffic conditions for both indoor and outdoor environments
 - Installs quickly with high-tack acrylic adhesive back
- Easily peel off the back liner and adhere to almost any clean, smooth, dry surface. Maintains a waterproof seal – resisting sliding, buckling, wrinkling, and peeling.

Meets ANSI/NFSI B101.1

OSHA 29 CFR 1910.24(f)
"Stair treads." All treads shall be reasonably slip-resistant and the nosings shall be of nonslip finish.

Super Skid-Gard™ Floor Tapes

36-grit surface provides extreme traction for extreme conditions.

Heavy foot traffic and dirty work environments can clog up standard anti-skid grit tape with mud, snow, oil, dust, liquids, and grease.

- Extra-course 36-grit textured surface
- Ideal for heavy debris areas both indoors and out
- Resistance to water, hydrocarbon, and other chemicals
- Aggressive, high-tack acrylic adhesive tape
- Apply to clean, dry surfaces, free of dirt and debris
