	•Compact positive displacement diaphragm dosing pump, with integrated variable speed motor drive, in an IP 65								
	plastic enclosure.								
	<ul> <li>The pump is designed for optimum user-friendliness, accuracy and reliability, and is equipped with a logical control panel with one-touch buttons and a multi-language backlight display.</li> <li>The capacity to be dosed in each function is set directly in gal,l, or ml per hour.</li> <li>For enhanced accuracy, the pump can be calibrated to the actual installation by means of a simple calibration function.</li> <li>The turndown ratio is 1 to 800 with the same accuracy and uniform dosage with reduced pulsation throughout the entire capacity range.</li> </ul>								
	<ul> <li>The pump is also equipped with a maximum capacity function (100%) that allows it to work for a preset time at max capacity to</li> <li>faciliate priming or ordinary maintenace, without modifying the pump's settings.</li> <li>The liquid end is composed of:</li> </ul>								
	•Pump head								
	<ul> <li>PTFE-coated diaphragm</li> <li>Ball valves</li> </ul>								
	·Manual bleed valve								
	Possible operating modes: •Manual dosing with direct setting in gph, ml/hour, or l/hour								
	Other features: •Electronic lock to prevent unauthorized setting changes •Anti-cavitation function for high-viscosity, gassing liquids or long suction lines								
	Maximum capacity limitation     Counters for numbers of nump	strokes bours of on	eration and nower o	n/off					
	<ul> <li>Counters for numbers of pump strokes, hours of operation, and power on/off.</li> <li>14 optional display languages.</li> </ul>
