Janitorial
Food Handling
Industrial
Pharmaceutical

Double coated
finger tips for added
strength.

Item. **V3016RT**

Two Tone, Vinyl Canner Gloves

- High oil and animal fat resistance, so ideal for poultry and meat packing industries
- 9 mil thickness in glove body and 16 mil thickness in finger tips. means double the strength, puncture and snag resistance where you need it most.
- USDA approved, Latex free and Phenol Free. Many food plants are switching to non-latex gloves to address concerns about latex allergies. Both for their own workers and for the consumer. Problem is nitrile gloves have been the only real alternative up to now. Nitrile is not as stretchy and comfortable as latex and is more expensive. The V3016RT vinyl canners gloves are stretchy and comfortable and cost about the same as latex gloves.
- Different colour for each size. Orange tips = size small. Yellow tips = size medium. Green tips = size large. White tips = size x-large. This makes gloves easy to sort after washing.
- An anti-mildew agent has been incorporated into the gloves
- Soft, stretchy and comfortable fit to increase employee comfort and productivity
