Gription Mechanics Gloves

#MXGBL

Superior Clutch Gear® gloves are known for their great style, comfort and dexterity. We use the best materials available to create gloves that are light yet strong, and let you hang on in many applications.

Our Gription® gloves are no exception: we've padded the backs as to protect against knocks, scrapes, and abrasion. Neoprene knuckle strap stretches for improved flexibility. Ergonomic styling adds even greater comfort and dexterity. The touch sensitivity of our Gription gloves is impressive, even with these added layers. High-performance Clarino® Parity man-made leather palms are strong, soft, and completely washable, because synthetic leather won't stiffen in cold, wet conditions, and dries quickly without cracking. Wide stretchy wrist bands feature Velcro® tabs at the back to let you adjust gloves for a snug, custom fit so cold and debris stay out.
