Winter Goat-Grain Driver Gloves with Kevlar®/Composite Filament Fiber

#378GKGD

Supple goat-grain drivers gloves are processed with Superior's own Oilbloc™ treatment for exceptional water and oil repellency. Oil simply won't soak through, not hours—or even days—after being dropped onto leather. (Untreated leather absorbs oils and liquids within seconds of contact.) And because it does not penetrate since it cannot leave a mark, gloves are highly stain resistant.

Goatskin has high tensile strength and abrasion-resistant properties and is often referred to as nature's strongest leather. Soft and lightweight, goat-grain leather glove is fully lined with a blend of Kevlar® and composite filament fiber, offering ASTM cut-level 4 protection.

Great for handling building materials, assembly work, farming, municipal work, utilities and metal fabrication. Gloves offer great dexterity with incredible warmth. Interior surface is Kevlar® lined with an assortment of specially placed Thinsulate™ material, offering thicker loft for exceptional winter warmth. Our special design also keeps the fingertips warmer as cold strikes the fingers first.
