

## Blue Seal ADVANCED COATING TECHNOLOGY

## THE BLUE SEAL ADVANTAGE. WE KEEP YOUR EQUIPMENT IN TOP CONDITION!

Blue Seal is specifically engineered to be an extremely durable, long-lasting coating system. It is a glass filled epoxy-vinyl-ester coating system, which expands the serviceability of traditional glass flake coatings. Blue Seal **decreases maintenance** and **operational cost** while having **zero impact on the environment.** 

#### **Applicable Industries:**

- Marine
- Oil & Gas
- Food Processing
- Military
- Municipalities
- Utilities
- Pulp & Paper
- Mining

# Blue Seal

### **SOURCE REVIEW**

#### **Industrial End Housing**

#### **Industrial Pipes**

#### **Kort Nozzle**

#### **Chemical Tanks**

#### **Pumps & Impellors**

#### The Blue Seal Advantage:

- Increased adhesive strength
- Environmentally clean
- Low coefficient of friction
- Superior resistance to mechanical stress
- · Excellent resistance to abrasion
- Virtually impermeable to liquids or vapor
- High impact resistance
- · Superior strength
- Extreme corrosion resistance
- · Increased elasticity
- Excellent thermal stabilization
- · Extended service life
- · High dielectric strength
