

Precision & Complex Part Production

With the best overall speed and performance in the marketplace, Mitsubishi wire EDM machines have intuitive, user-friendly controls, internal designs that reduce wear and tear, while minimizing downtime and maintenance costs

A new world of increased throughput, cost efficiency, process optimization and more is waiting for you.

EASY TO LEARN

The new Advance Pendant Box uses a thin tapered design with a 3.5" LCD touchscreen interface to provide the operator with a greater depth of functionality. This helps shave considerable time off of setup and day-to-day operation alike.

EASY TO USE

New software functions help operators with a setup checklist and enhanced maintenance screens to keep track of operations. All-new common shape macros reduce programming time by as much as 88%.

EASY ON YOUR STAFF

The M800 series CNC control takes design cues from consumer electronic devices to keep users productive and comfortable, day in and day out. The large 19" touchscreen provides an easy, intuitive interface—housed on an ergonomic tilt/swivel mounting system—that allows users to swipe, pinch, and tap to view important job information in a single view.

EDM

WIRE EDM's

With the best overall speed and performance in the marketplace, Mitsubishi wire EDM machines have intuitive, user-friendly controls, internal designs that reduce wear and tear, while minimizing downtime and maintenance costs.

SINKER EDM's

When it comes to razor-sharp precision on hardened materials, nothing beats a sinker EDM machine from Mitsubishi Electric. Advanced controls, on-board automation capabilities, and a superior power supply make our sinker EDM machines the ideal choice for tight-tolerance applications in industries including aerospace, energy, medical, and die/mold.

CNC Machine and Automation Solutions

At Source Atlantic, we understand the complexities of manufacturing and the importance of having a dedicated team by your side. That's why we've compiled a specialized team tailored to meet all your CNC Machine Tool supply, repair & maintenance service needs.
