ECO-GEL™ BY FIRE REIN

Eco-Gel™ is the world's first 100% non-toxic fire protection hydrogel, capable of extinguishing Class A and Class 8 fires quickly and safely.

Eco-Gel™ works with standard firefighting apparatus, pumps, hose and other equipment.

Knocks down fires quickly using less water, less runoff, easier clean-up.

Protects exposures threatened by fire, hot work, sparks or wayward embers.

Environmentally benign formula does not impact soils, wildlife vegetation, and marine habitats. Eliminates costly remediation and disposal.
